

Lifestyle MTB 59,000-89,000 baht

This is our highest technology ebike, fully equipped with high technology features for weight savings and design (such as the unnoticeable battery in the lower tube of the frame), as well as the ultimate off-road ebike! The MTB is also only pedal assist, so for those that prefer exercise and excitement over daily transportation.

The more expensive, the higher the quality items are added, such as more gears (starts at 21 and ends at 30), mid suspension of SR Suntour Radion R remains, better front forks (Rockshox, Manitou, Suntour, RST) and finally twin 350W motor. Lastly, customers may choose 26 or 29 inch wheels. Weight starts at 15kg and goes down from there, depending on model!

Battery is at 33V 10.2AH, with range of at least 60km!

Unistyle Freego 18,000 baht

This is our revolutionary method of transportation. Single wheeled design, with integrated stability system for very unique movement. Firstly, the rider places their feet on each side of the fold-able pedals of the frame, and then gently inclines forward to gain forward momentum, lean right and left allows turning and leaning back allows for slowing down and even reverse mode. The more you lean, the faster the speeds. The inside gyroscopes insure it keeps good balance and stability. Learning takes from 10 minutes up to 3 days, depending on the motivation of the rider and the time spent. It comes with assist wheels. Top speed is 13km/h and range of 17km. Perfect for condominium owners, security at shopping malls or airport security, and skywalk/BTS use! Weighs 10kg
